

## 1. PHY 2030 - L.JOURNAL

In Section R4.5, Moore references two experiments that confirm the calculation of proper time measured by a non-inertial clock. One experiment is by Bailey, et al. and the other is by Hafele and Keating. Using the HPU library or other resources, obtain a copy of one of the articles, print the article, write a summary of the article (of at least 600 words), and submit the article and your summary.
