

The `eso-pic` package*

Rolf Niepraschk
niepraschk@ptb.de

Abstract

This package makes it easy to add some picture commands to every page.

1 Introduction

This package is an extension to Martin Schröder's `everyshi` package. Using `everyshi`'s `\EveryShipout` command `eso-pic` adds one or more userdefined `picture` commands to \LaTeX 's shipout routine.

2 Usage

2.1 Basic commands for adding \LaTeX stuff to the page background

| | |
|------------------------------------|---|
| <code>\AddToShipoutPicture</code> | All the picture commands which are parameters of an <code>\AddToShipoutPicture</code> command will be added to the internal macro <code>\ESO@HookI</code> . This macro is part of a zero-length <code>picture</code> environment with basepoint at the lower left corner of the page (default) or at the upper left corner (package option "texcoord"). The <code>picture</code> environment will be shipped out at every new page. |
| <code>\ClearShipoutPicture</code> | A call of <code>\ClearShipoutPicture</code> clears the contents of <code>\ESO@HookI</code> . |
| <code>\AddToShipoutPicture*</code> | <code>\AddToShipoutPicture*</code> works like <code>\AddToShipoutPicture</code> but only for the current page. It used the internal macro <code>\ESO@HookII</code> which contents will be removed automatically. |
| <code>\LenToUnit</code> | Allows a length as parameter to a picture command. |
| <code>\gridSetup</code> | <code>\gridSetup[\langle gridunitname \rangle]{\langle gridunit \rangle}{\langle labelfactor \rangle}{\langle griddelta \rangle}{\langle gridDelta \rangle}{\langle gap \rangle}</code> . For details see the implementation section. |
| <code>\AtPageUpperLeft</code> | Helper macros for easier positioning on the page. |
| <code>\AtPageLowerLeft</code> | |
| <code>\AtPageCenter</code> | |
| <code>\AtTextUpperLeft</code> | |
| <code>\AtTextLowerLeft</code> | |
| <code>\AtTextCenter</code> | |

*This document corresponds to `eso-pic` v1.1b, dated 2002/11/16.

2.2 Package options

| Option | Value | Comments |
|---------------------------|-------------------------------|--|
| <code>pscoord</code> | empty or <i>true, false</i> | The zero point of the coordinate system is the lower left corner of the page (the default). |
| <code>texcoord</code> | empty or <i>true, false</i> | The zero point of the coordinate system is the upper left corner of the page. |
| <code>grid</code> | empty or <i>true, false</i> | A grid is drawing; default: false. |
| <code>gridunit</code> | <i>mm, in, bp, pt</i> | Distance between gridlines are multiples of <code>gridunit</code> . default: mm. |
| <code>gridcolor</code> | a valid color name | Color of the main gridlines; default: black |
| <code>subgridcolor</code> | a valid color name | Color of the subgridlines; default: black. |
| <code>subgridstyle</code> | <i>solid</i> or <i>dotted</i> | ‘dotted’ is very slow! default: solid. |
| <code>colorgrid</code> | empty or <i>true, false</i> | Shortcut for ‘grid=true’, ‘gridcolor=red’ and ‘subgridcolor=green’; default: false. |
| <code>dvips</code> | empty or <i>true, false</i> | Is also true if the package option <code>dvips</code> is used by <code>color</code> or <code>graphics</code> . If true package <code>eeepic</code> is loaded for better performance of dotted lines. |

3 Implementation

3.1 The main functionality

```

1 \RequirePackage{everyshi}

\LenToUnit

2 \newcommand\LenToUnit[1]{#1\@gobble}

\AtPageUpperLeft

3 \newcommand\AtPageUpperLeft[1]{%
4   \begingroup
